

Green Power

We're delighted to announce that BUC has taken a significant step by switching our Sydney Rd site's electricity from 20% to **100% GreenPower**.

In addition to supporting renewable energy generation in Australia (through the GreenPower surcharge), **our electricity usage is now also offset** through high quality Carbon Offset projects. Powershop Australia, our new provider, invests in these on our behalf as part of its standard (and price-competitive) service.

We have also (in June 2020) transferred to Powershop Gas supply, which is also "carbon neutral". That is, the carbon emissions from our gas usage are offset by Powershop on our behalf .

Powershop "switch a friend" bonus now available!

Would you like to help yourself, BUC and the planet all at the same time? If you switch to Powershop electricity based on BUC's referral, then they will credit you and BUC with \$75 towards each of our accounts.

Naturally, you should do your homework about whether that makes sense for you overall.

If you do want to switch, and credit BUC as part of the deal, follow this link:
