Or go straight to our Website: [brunswick.unitingchurch.org.au](http://brunswick.unitingchurch.org.au) (There are also some appendices you might like to view)

**Let's all commit ourselves to building a just, caring and sustainable future for God's Earth and all its creatures.**

### Key Points

- BUC is effectively carbon neutral through its purchase of Green energy from Diamond Energy.
- BUC will further reduce its emissions as it continues to replace or improve the efficiency of various appliances, , improve efficiency of other appliances, avoid unnecessary usage, further improve insulation, and investigate additional solar collectors.
- To put BUC emissions into context, its annual emissions are roughly equivalent to 2 typical suburban households. If we could influence our 250 individual members to take personal household action, this would result in a much greater impact on reducing global greenhouse gas emissions.
- BUC may achieve even greater impact if our members further engage in campaigns to influence businesses (both local and large-scale) and government, working in collaboration with religious and/or secular groups.
